# NOFIT STATE CIRCUS

An award-winning company with fourteen years experience of big top tent touring throughout Wales, the UK and Europe and an international reputation for innovative, exciting and highly accessible circus theatre.

Leading the British Renaissance in large scale circus theatre spectacle, with its ground-breaking fusion of traditional circus skills and spectacle, with narrative drama, physical theatre, dance, music, film and new technologies.

NoFit State is a non profit making organisation that funds its artistic objectives through commercial activities.

This booklet describes the many high quality services and latest state of the art equipment we can supply.

## Lighting

Using Avolites Dimming and an Avolites Pearl desk we can make our Coemar 575 iSpots match, and better, the performance of the standard Mac 500. When you add in the Coemar 575 Prowashes the over all effect is stunning. Augment this with our massive Par-can rig and Thomas Truss and we are talking major Rock and Roll. Add our supply of conventional theatre lanterns and we can light literally any style of event or performance.

Due to the nature of our work we also have available a huge quantity of power distribution equipment as well as site and emergency lighting.

## Sound

Again we use the best possible equipment. Our Tannoy V300 speakers supplemented with Tannoy super dual B475 sub bass' deliver a stunningly clear and crisp sound. We drive these with Yamaha CP200 amplifiers, one amp per speaker, through Beringer Xsovers, and a Yamaha O2R digital mixer enabling the creation of live surround sound effects.

We have a large selection of Sennhiser radio and lead mics, Makie SRM450 monitors, Comms and miles of every conceivable cable.

A FOH rack contains MiniDisc and dual CD sources. A MOTO 828, a G4 with Midi interfaces open up a world of possibilities.

Both the lighting and sound rigs are comprehensive and versatile. The systems can be adapted for performances, conferences, events or parties.

## Digital Video

Smaller is not always better, our 5000 Ansi lummin Barco data/video 9200 projectors might be big but leave a comparable LCD model in the dark.

The 1.5-3.1 lens has superb optics and gives a good range of distance to throw ratios.

They can come complete with full flying gear.

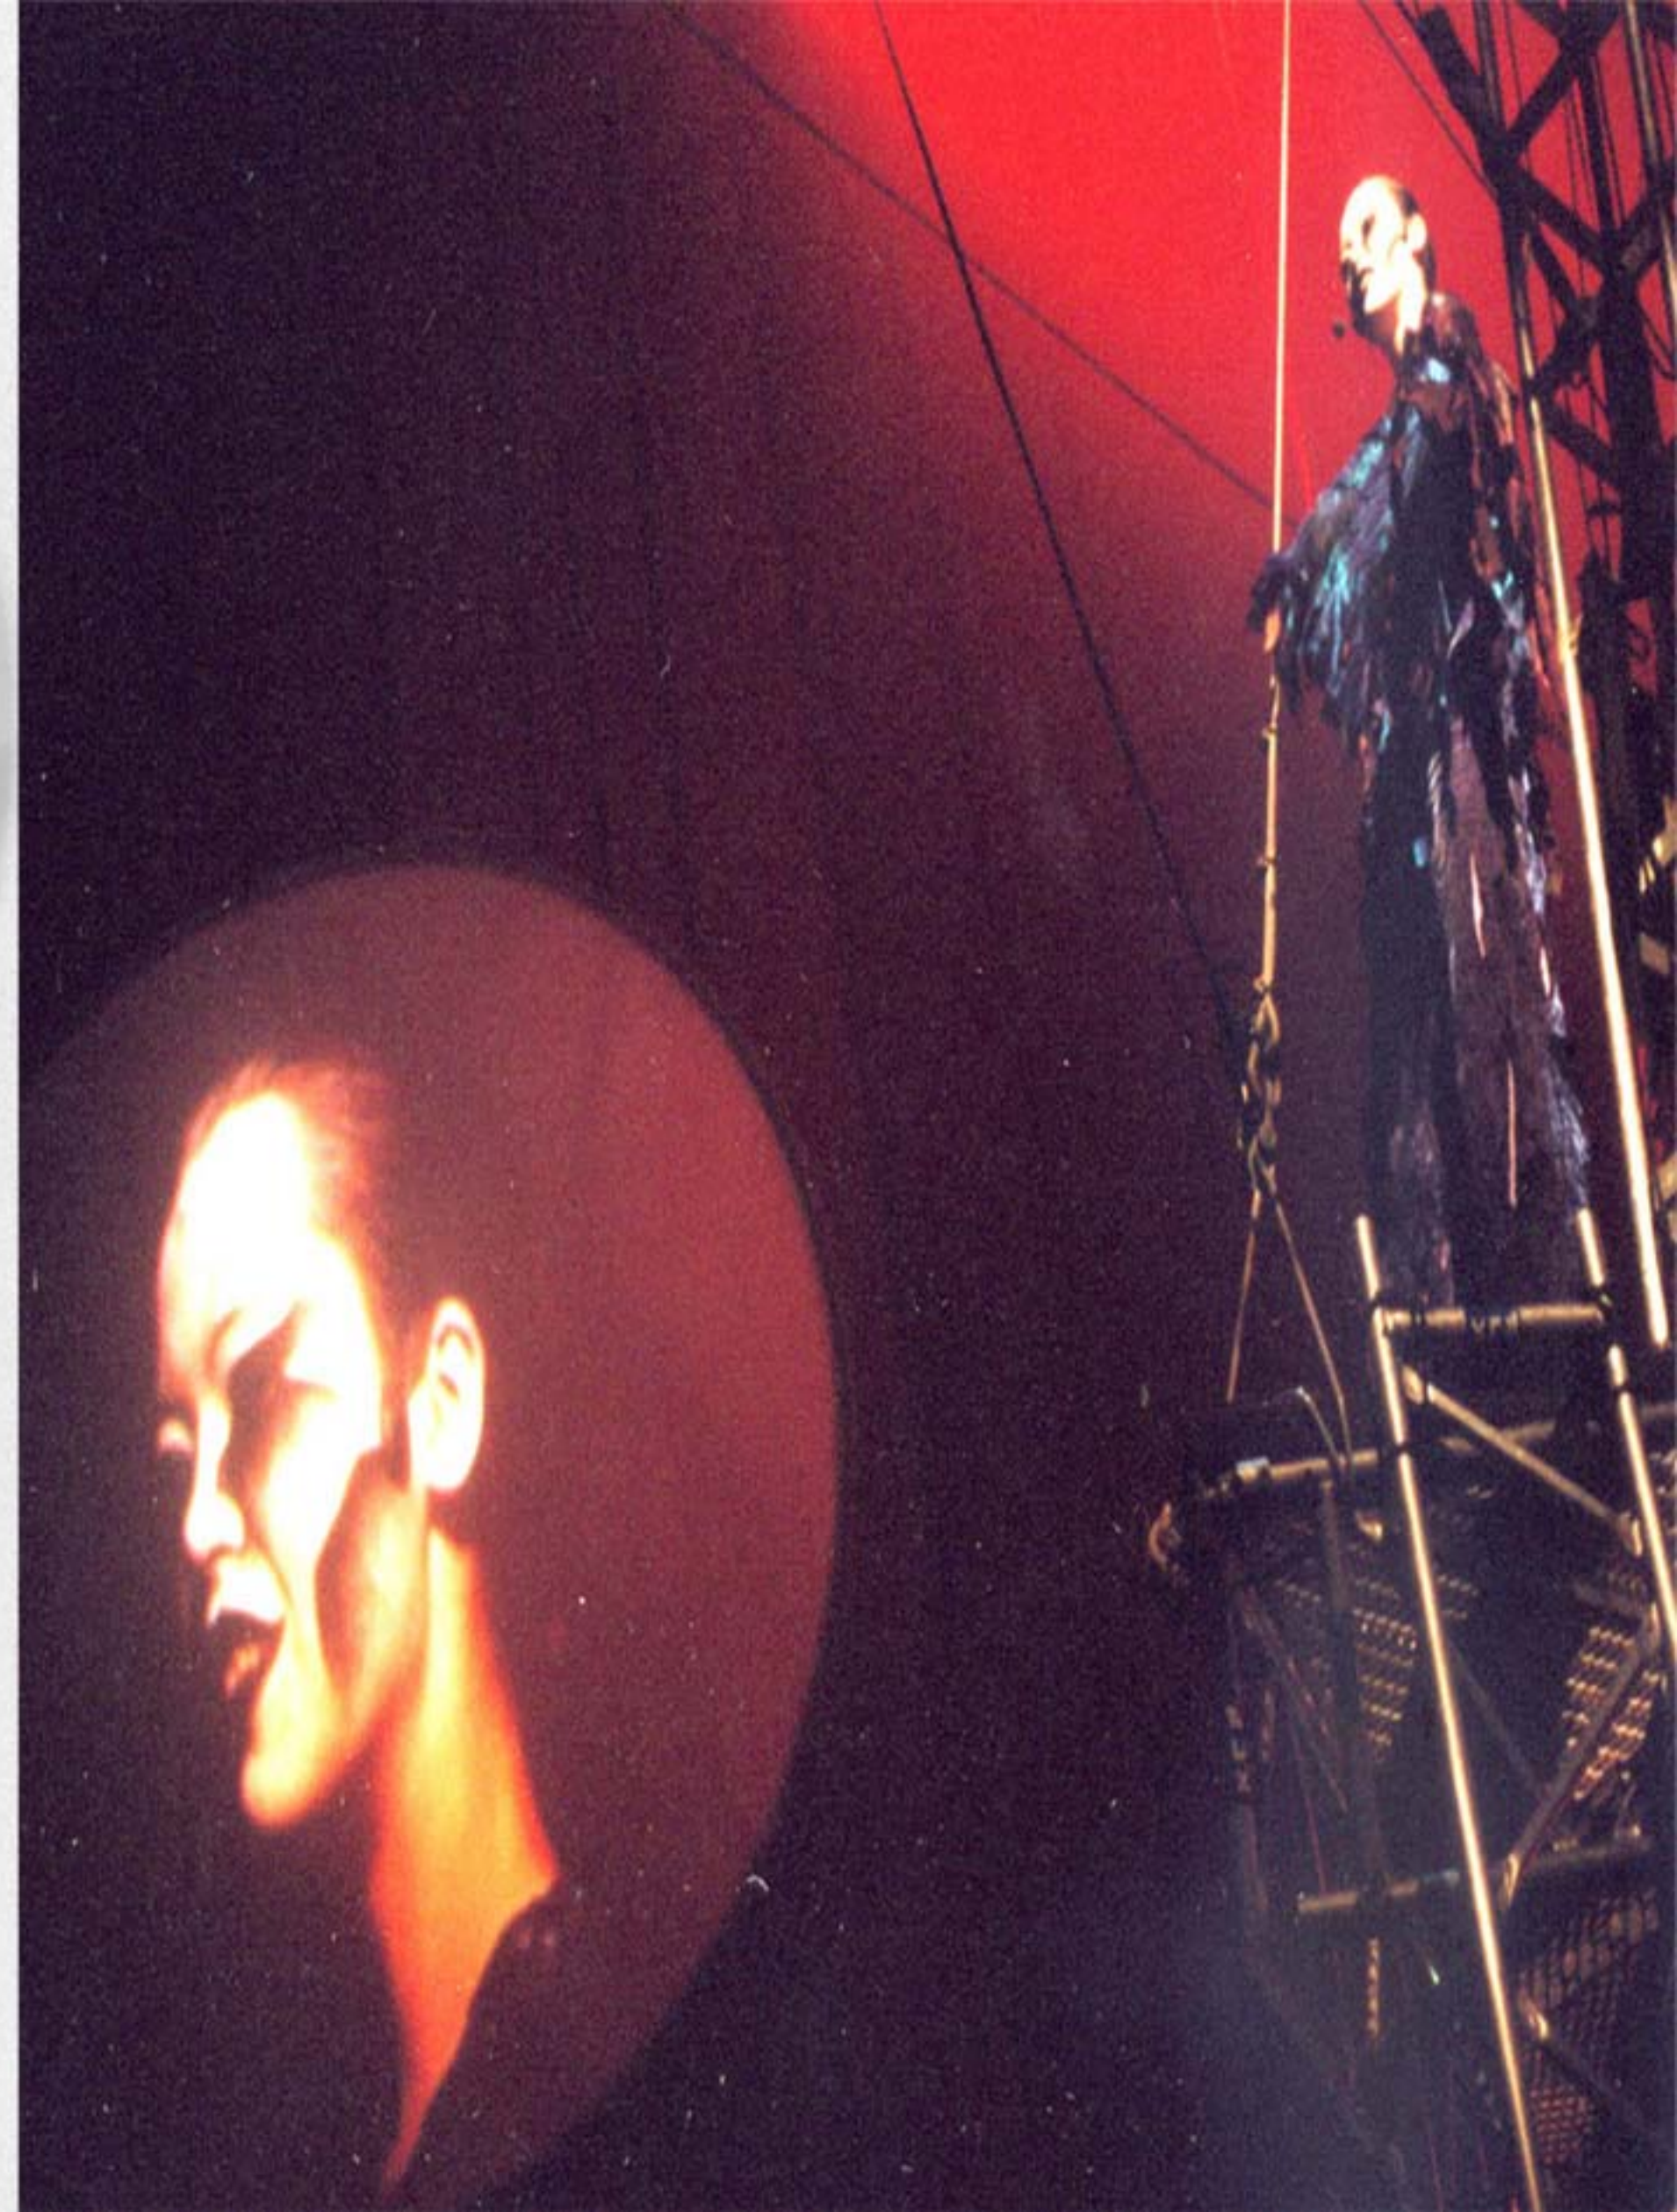

To use the Barcos at their best we use a Syncro master 450 data vision mixer, which allows us to project video at a high definition data resolution giving the brightest, crispest and sharpest picture possible.

Two Sony PD150 cameras can deliver live footage, this is pre mixed through a Panasonic MX12 before it hits the Syncro Master.

A Power Mac G4 is integrated into the system for hard disk or DVD playback. This comes with Premier or Final Cut Pro software for interactive video or last minute adjustments.

This system is more than adequate for conference work but truly excels when used in live performance or for party venues.

Our technical team are highly experienced at integrating video into live shows and can advise and assist throughout the process.

## The Space ship structure

This radical re-think of the conventional circus tent brings new materials, state of the art design, and modern manufacturing techniques to a traditional temporary structure.

The visually striking exterior is guaranteed to make an impact on any environment, whilst the versatile interior provides an inspiring and original environment for any large scale event, party or meeting.

The tent has a 38M diameter with the roof swooping right down giving the structure a 1135 sq. M footprint. A 32M diameter area inside the tent creates a 800 Sq. M auditorium.

It has been used successfully as a party venue, a hospitality tent, a performance space and for product launches. Previous clients include: Dr Party, Bulmers, Gatecrasher, Compass Point and Cardiff City Council

## "Big Top" Hire

The 'Big Top' can come complete with seating, a theatrical lighting rig, PA, and crew. It makes an ideal performance space for festivals, parties and live events

The 'Big Top' has an internal footprint of 335 Sq m making it large enough for a fully seated audience of 350 mixed (300 adult) yet retaining a very intimate atmosphere.

The big top makes a fantastic setting for family entertainment, adult cabaret, folk nights, theatre, comedy events, real ale, classical music, or as a fringe venue.

### NoFit State Offer:-

- \* A visually striking venue
- \* Seating
- \* Staging
- \* Lighting
- \* PA
- \* Power
- \* F.O.H management
- \* Technical crew
